<i>Notes From New York</i>	8

Amver attends NEVA 2007

The Amver Maritime Relations staff recently returned from the 9th NEVA exhibition in St. Petersburg, Russia.

Amver Web site hits increased 238% and several shipping companies seized the opportunity to enroll their vessels. Russian vessels already enrolled in the system increased their reporting.

“It is the only occasion where the entire Russian maritime spectrum gathers in the same place, at the same time,” explains Roderick Keay, General Director of Dolphin Exhibitions, joint organizers of the event with the Transstec NEVA Exhibitions Company. “This gather-

ing of Russian ship owners can have a very positive impact on the Amver system if only a fraction of them enroll their vessels” he continued.

U.S. Coast Guard Vice Commandant Vivien Crea agreed that an increase in Russian participation was a benefit to shipping.

“As commercial shipping increases in austere and hazardous parts of the world, we will need to rely on each other to assist and respond to distress in the event of a maritime emergency” said Vice Admiral Crea.

Amver tanker assists migrants

The tanker Cap Diamant, while sailing to Dalia, Angola, notified the U.S. Coast Guard Sector San Juan they were hailed by a 23 foot migrant vessel adrift and taking on water off the coast of Puerto Rico on

September 1, 2007.

The Cap Diamant stood by until U.S. Coast Guard Cutters could safely embark the 31 migrants.

Amver participant rescues ten from fiery ferry

On the morning of July 24, the Amver participating merchant vessel Federal Rhine rescued 10 survivors from the burning trans-island ferry Katrina.

The Federal Rhine, operated by the Montreal based shipping line FedNav, noticed the burning ferry in the Philippine Sea and quickly assumed search and rescue mission coordinator requesting another nearby ship to assist in rescue efforts.

During rescue operations the mas-

ter of the Federal Rhine coordinated with the Philippine Coast Guard, Maritime Rescue Coordination Cen-

ter Manila, and the U.S. Coast Guard Amver center in West Virginia.

Within six hours of finding the burning ferry, the crew of the Federal Rhine safely transferred all the survivors to search and rescue authorities from the Bongao province.

According to survivors, the Katrina was on a voyage from Sanga Sanga Island to Bongao when it caught fire.

Amver awards ceremony in Vietnam

The United States Embassy Hanoi congratulated the Vinashin Eagle of Vietnam's Vinashin shipping company for its participation in the U.S. Coast Guard Amver System during 2006.

The annual Amver awards were presented in a ceremony at the Vinashin Shipping Company Headquarters, Hanoi, on August 30,

2007. The U.S. Coast Guard's Lieutenant Commander, Scott Stoermer, and Lieutenant Commander Yuri Graves, led the presentation, assisted by Vinalines General Director, Mr. Tran Van Liem. Senior company executives were recognized for a wise business decision to enlist their ships in this voluntary reporting system.

Your story could be here

Amver is always looking for pictures and stories to go along with dramatic rescues at sea. We don't know about every rescue so we rely on you, the mariner, to be our eyes and ears.

Certainly the safe execution of rescue operations take precedence but

if you or your crew are able to capture photos or video please send them to our office. Our mailing and email addresses are on the back page of each Amver Bulletin.

Remember, your photos or video may be seen around the world! Send those pictures today.

Transpacific rower rescued by newly christened Amver ship

The Amver participating vessel Overseas Long Beach assisted in the rescue of transpacific rower Roz Savage by providing a much needed lee, communications between Savage and U.S. Coast Guard aircraft, and a make shift sea anchor.

Savage was attempting a three stage solo rowing challenge from California to Australia. Her troubles started August 23 after rough weather capsized her boat fouling most of her electronic equipment. A concerned party notified the U.S. Coast Guard on Savage's behalf which set the rescue operation in motion. The Overseas Long Beach,

a United States flagged tanker owned by the Overseas Shipholding Group, was called to assist Savage approximately 90 miles off the coast

of Humboldt Bay, California.

Sea conditions were too rough for the Overseas Long Beach to affect a rescue. Instead they provided communications and equipment to help stabilize Savage's ocean rowboat until Coast Guard helicopters could hoist her to safety. Ms. Savage was reluctant to abandon ship at first but was soon convinced it was in her best interest to allow the Coast Guard to hoist her to safety.

Attention Amver veterans

As the 50th anniversary of Amver approaches, the staff of the Amver office in New York invites former Amver shipmates and mariners to share their stories.

Do you remember working in New York at either the Amver center in the Customs House or on Governor's Island? Maybe you were

a watch stander who took mayday calls and diverted Amver ships.

Regardless of your affiliation with Amver we want your stories!

Feel free to email or mail in photos, memorabilia, or stories to our address on the back page. You can also email Benjamin Strong, Marketing Director, with your informa-

tion. While there are no current plans for a formal reunion, the Amver staff is open to organizing some sort of get together for former Amver shipmates. You can email the Amver office with your thoughts or contact information as well.

Amver is proud of its history. Now its time to hear from you and share the Amver story with the world.

Amver vessel provides much needed communications

Amver vessels aren't limited to just rescuing people in distress as demonstrated by the bulk carrier Luxury SW off the coast of Oregon.

The Luxury SW was diverted to assist the 36 foot fishing vessel Ida West II which was taking on water

approximately 120 nautical miles off the Columbia River entrance.

U.S. Coast Guard helicopters, along with the U.S. Coast Guard Cutter Alert, responded.

The Luxury SW arrived on scene and provided a lee while relaying

important information between the fishing vessel and Coast Guard responders.

Fortunately the Coast Guard was able to lower a rescue swimmer and dewatering pump to the fishing vessel which was able to make it to port under its own power.

Welcome new Amver participants enrolled between July and September 2007

Saving Lives at Sea since 1958

Visit us on the web at
www.amver.com

Amver, sponsored by the United States Coast Guard, is a unique computer based, voluntary ship reporting system used worldwide by search and rescue authorities to arrange for assistance to persons in distress at sea. With Amver, rescue coordinators can identify participating ships in the area of distress and divert the best suited ship to respond.

Amver's mission is to quickly provide search and rescue authorities, on demand, accurate information on the positions and characteristics of vessels near a reported distress.

Notes from New York

After a successful trip to Russia and London, coupled with the winding down of a very busy awards season the Amver staff can finally start to breathe a bit easier. This rest, however, will not be short.

The Amver program is preparing for its 50th anniversary in 2008 and planning has been underway for some time.

Dinners, awards, public events, and

additional stories and publications are just some of the things planned for 2008.

In recognition of Amver's achievement of 50 years there are some enhancements to the system rolling out as well. Automating the process for rescue coordination centers to request Amver surface pictures is just one of the enhancements we have launched.

We would love to hear from shipmates that have worked in the Amver center over the last 50 years. We would also love to hear from shipmates that have been at sea, faithfully sending Amver messages through the years.

Amver is traveling to China to take part in Marintec 2007. Come by the stand and visit us at the Shanghai

New International Expo Centre, Pudong Shanghai, PRC. Amver will be in booth 1K32. We look forward to seeing our old friends and making new acquaintances along the way.
